Eye protection:

Use safety eyewear designed to protect against splash of liquids.

Protection for skin:

Chemical protection clothing.

Protection for hands:

For all types of exposure, a glove with protection class of 2 or higher (breakthrough time > 30 minutes according to EN374) is recommended. Recommended gloves: Nitrile, thickness = 0.12 mm. NOTICE: The selection of a specific glove for a particular application and duration of use in a workplace should also take into account all relevant workplace factors such as, but not limited to: Other chemicals which may be handled, physical requirements (cut/puncture protection, dexterity, thermal protection), potential body reactions to glove materials, as well as the instructions/ specifications provided by the glove supplier. The user must check that the final choice of type of glove selected for handling this product is the most appropriate and takes into account the particular conditions of use, as included in the user's risk assessment. Gloves should be replaced regularly and if there is any sign of damage to the glove material. Always ensure that the gloves are free from defects and that they are stored and used correctly.

Respiratory protection:

Safety Data Sheet

TEAK WONDER BRIGHTENER

If workers are exposed to concentrations above the exposure limit, they must use appropriate, certified respirators.

Thermal Hazards:

None

Environmental exposure controls:

Do not allow to enter drains or watercourses.

Appropriate engineering controls:

Provide adequate ventilation. Where reasonably practicable, this should be achieved by the use of local exhaust ventilation and good general extraction. If these are not sufficient to maintain concentrations of particulates and solvent vapours below the OEL, suitable respiratory protection must be worn.
